SUMMARY

A results-driven Frontend Developer with nearly two years of experience building high-performance, responsive web applications. I specialize in transforming complex business requirements into clean, scalable, and user-centric digital solutions, with a strong focus on code optimization and creating intuitive user experiences.

SKILLS

- **Languages:** JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js
- **Tools & Platforms:** Git, GitHub, Vercel
- **Styling:** Tailwind CSS, Ant Design

WORK EXPERIENCE

Tikanga Private Limited.	Apr 2024 - Present
SDE	
• Architected and implemented a component-based architecture for a hyperlocal food-tech e-commerce platform, focusing on the merchant dashboard, analytics, and real-time offer workflows. • Built and managed complex state management logic for a large-scale dairy-tech distribution system, handling inventory, dealer workflows, and real-time reporting. • Developed a secure, multi-step fintech onboarding UI featuring complex redirection logic for Digilocker KYC verification and integrated an automated bank-linking interface for seamless SIP management. • Integrated third-party APIs and services, including Mapbox for geospatial mapping and AntV Charts for data visualization on a power supply analytics dashboard. • Engineered and implemented critical frontend features such as QR-based offer redemptions, automated stock alerts, and role-based access control. • Designed and engineered a high-conversion landing page with a cinematic dark theme, featuring complex UI-side financial calculators for real time investment projections. • Collaborated closely with backend developers to ensure seamless API integration and data flow. • Reduced unnecessary API calls by up to 40% by implementing debouncing logic, leading to a more responsive UI and decreased server strain. • Worked directly with stakeholders in an Agile environment to gather requirements, provide technical insights, and translate business needs into user-friendly digital solutions.	

PROJECTS

Coorg villa and Recipe finder Website	June 2023 - Oct 2023
• Engineered a fully responsive homestay website using HTML and CSS, focusing on a clean UI to showcase local attractions and amenities. • Developed a dynamic recipe finder website with vanilla JavaScript, allowing users to filter and view ingredient lists, demonstrating strong foundational web development skills.	

EDUCATION

St Joseph Engineering College,	Aug 2019 - May 2023
Bachelor of Engineering (ECE) - 8.23
